

Ensuring continuity in learning with the Schools Leasing Framework

Based in Wigan, Cansfield High School is a secondary school with more than 900 students. In order to adapt to the “new normal”, the school was looking for a way to deploy new PCs, without damaging their cash reserves. They opted for the Schools Leasing Framework, a simple and fully compliant operating lease solution which facilitates the financing of all forms of digital projects for all schools in the UK. Underpinned by Link Asset Services, the framework allowed Cansfield High School to lease 250 HP ProOne PCs for 3 years.
